DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 19-20, filed 7/14/06, with respect to the rejection of claims 1 and 13 have been fully considered and are persuasive. The rejection of claims 1-3, 13, 19 and 21-23 has been withdrawn.

Allowable Subject Matter

2. Claims 1-25 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach a radio reception system for receiving signals from a plurality of users comprising a plurality of error determining means for determining whether the signal components corresponding to the plurality of users extracted by the first signal extracting means include a demodulation error or not, and operating means for subtracting from the signal output from the signal processing means, the extracted signal component determined by the first error determining means not to include any demodulation error as recited in claim 1, and error determining means for determining whether the signal components corresponding to the plurality of users extracted by the first signal extracting means include a demodulation error or not and when determined to include the demodulation error, disabling removal of the signal component corresponding to the specific user by the operating means, as recited in claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
